Referral to Registrar under section 23.

19. (1) Where, following the making of such an order as is mentioned in section 23(3), a question is referred to the Registrar under section 23(5) as to whether any person is entitled to be granted a licence or whether the period or terms of the licence are reasonable, the reference shall be made on Patents Form 6 and shall be accompanied by a copy thereof and a statement setting out fully the facts upon which the person making the reference relies and the terms of the licence which he is prepared to accept or grant.

(2) The Registrar shall send a copy of the reference and statement to every person in whose name the application is to proceed or, as the case may be, every person claiming to be entitled to be granted a licence, in either case not being the person who makes the reference, and if any recipient does not agree to grant or accept a licence for such period and upon such terms, he shall, within 2 months from the date of the Registrar's letter forwarding such copies to him, file a counter-statement on Patents Form 3 setting out fully the grounds of his opposition and the Registrar shall send a copy of the counter-statement to the person making the reference.

INVENTORS

Mention of inventor.

20. (1) An application to the Registrar under section 24(1) or (3) by any person who alleges –

(a) that he ought to have been mentioned as the inventor or joint inventor of an invention in any patent granted or published application for a patent for the invention; or

(b) that any person mentioned as sole or joint inventor in any patent granted or published application for a patent for the invention ought not to have been so mentioned,

shall be made on Patents Form 7 and shall be accompanied by a statement setting out fully the facts relied upon.

(2) The Registrar shall send a copy of any such application and statement to –

(a) every person registered as proprietor of, or applicant for, the patent (other than the applicant under section 24 himself);

(b) every person who has been identified in the application for the patent or a statement filed under section 24(2)(a) as being, or being believed to be, the inventor or joint inventor of the invention; and

(c) every other person whose interests the Registrar considers may be affected by the application.

(3) Any recipient of a copy of such an application and statement who wishes to oppose the application shall, within 2 months from the date of the Registrar's letter forwarding such copies to him, file a counter-statement on Patents Form 3 setting out fully the grounds of his opposition, and the Registrar shall send a copy of the counter-statement to each of the persons described in this rule other than any person who is party to the counter-statement.

(4) The Registrar may give such directions as he may think fit with regard to the subsequent procedure.

(5) The document prescribed for the purposes of section 24(1) shall be an addendum or erratum slip.

Procedure where applicant is not inventor or sole inventor.

21. (1) Subject to rules 32 and 92(9) and (10), the period prescribed for the purposes of section 24(2) shall be –

(a) where there is no declared priority date, 16 months from the date of filing of the application for a patent; or

(b) where there is a declared priority date, 16 months from the declared priority date.

(2) A statement filed under section 24(2) shall be made on Patents Form 8.

(3) Where –

(a) the applicant is not the sole inventor; or

(b) the applicants are not the joint inventors of the invention,

and the application does not contain a declared priority date which relates to an earlier relevant application as defined in section 17(9)(b), the Registrar shall send a copy of the Patents Form 8 filed under sub-rule (1) to each inventor who is not one of the applicants.

(4) Where the application is an international application for a patent (Brunei Darussalam), the requirements of sub-rule (1) shall be treated as having been complied with if the provisions of rules 4.1(a)(iv) and 4.6 of the Rules under the Patent Co-operation Treaty have been complied with, whether or not there was any requirement that they be complied with.

APPLICATIONS FOR PATENTS

Application for grant of patent.

22. (1) A request for the grant of a patent shall be made on Patents Form 1.

(2) Where a document containing an indication that a patent is sought in pursuance of an application is filed with the Registrar without Patents Form 1 or the filing fee, the Form shall be filed with, and the fee shall be paid to, the Registry within one month from the date of the filing of the document.

(3) The specification contained in an application for a patent made under section 25 shall state the title of the invention and continue with the description and the claim or claims and the drawings, if any, in that order.

(4) The title appearing in the request, specification and abstract shall be short, precise and indicate the matter to which the invention relates; and if in the opinion of the Registrar it fails to comply with this sub-rule, the Registrar may reframe it so that it does so comply.

(5) The description shall first state the title of the invention as appearing in the request and shall –

(a) specify the technical field to which the invention relates;

(b) indicate the background art which, as far as it is known to the applicant, can be regarded as useful for the understanding, searching and examination of the invention;

(c) disclose the invention as claimed in such terms that the technical problem, even if not expressly stated as such, and its solution can be understood, and shall state the advantageous effects, if any, of the invention with reference to the background art;

(d) briefly describe the figures in the drawings, if any;

(e) set forth at least one mode for carrying out the invention claimed, with examples where appropriate, and with reference to the drawings, if any; and

(f) indicate explicitly, when it is not otherwise obvious from the description or the nature of the invention, the way or ways in which the invention satisfies the condition in section 13(1)(c) of being capable of industrial application.

(6) The number of claims shall be reasonable in consideration of the nature of the invention claimed, and where there are several claims, the claims shall be numbered consecutively in Arabic numerals.

(7) The definition in the claim of the matter for which protection is sought shall be in terms of the technical features of the invention which may be expressed in structural, functional or mathematical terms.

(8) Claims shall be written –

(a) in 2 parts, the first part consisting of a statement indicating those technical features of the invention which are necessary in connection with the definition of the claimed subject-matter and which, in combination, appear to be part of the prior art and the second part preceded by the words “characterised in that”, “characterised by”, “wherein the improvement comprises”, or other words to the same effect, followed by a statement stating concisely the technical features which, in combination with the features stated in the first part, define the matter for which protection is sought; or

(b) in a single statement containing a recitation of a combination of several elements or steps, or a single element or step, which defines the matter for which protection is sought.

(9) Claims shall not rely, in respect of the technical features of the invention, on references to the description or drawings, unless such a reference is necessary for the understanding of the claim or enhances the clarity or conciseness of the claim.

(10) Where –

(a) the documents filed at the Registry to initiate an application for a patent include something which –

(i) is or appears to be a description of the invention for which the patent is sought; and

(ii) is in a language other than the English language; and

(b) the applicant has not filed an English translation of that thing, the Registrar shall notify the applicant that an English translation of that thing is required.

(11) Where the applicant has been notified under sub-rule (10), he shall, within 2 months from the date of the notification, file an English translation of that thing.

(12) If the applicant fails to comply with sub-rule (11), the Registrar shall refuse his application for a patent.

Micro-organisms.

23. The Fourth Schedule shall have effect in relation to certain applications for patents, and granted patents, for inventions which require for their performance the use of micro-organisms.

Drawings.

24. (1) Drawings forming part of an application for a patent made under section 25 shall be on sheets the size of which shall be A4 (29.7 cm x 21 cm).

(2) The sheets shall not contain frames round the usable or used surface.

(3) The minimum margins shall be as follows –

- (a) top: 2.5 cm;
- (b) left side: 2.5 cm;
- (c) right side: 1.5 cm; and
- (d) bottom: 1.0 cm.

(4) The margins, when submitted, must be completely blank.

(5) Drawings shall be executed as follows –

- (a) without colouring in durable, black, sufficiently dense and dark, uniformly thick and well-defined lines and strokes to permit satisfactory reproduction;
- (b) cross-sections shall be indicated by oblique hatching which should not impede the clear reading of the reference signs and leading lines;
- (c) the scale of the drawings and the distinctiveness of their graphical execution shall be such that a photographic reproduction with a linear reduction in

size to two-thirds would enable all details to be distinguished without difficulty. If, as an exception, the scale is given on a drawing, it shall be represented graphically;

(d) all numbers, letters and reference lines, appearing on the drawings, shall be simple and clear and brackets, circles and inverted commas shall not be used in association with numbers and letters;

(e) each element of each figure shall be in proper proportion to each of the other elements in the figure, except where the use of a different proportion is indispensable for the clarity of the figure;

(f) the height of the numbers and letters shall not be less than 0.32 cm and for the lettering of drawings, the Latin and, where customary, the Greek alphabets shall be used;

(g) the same sheet of drawings may contain several figures; where figures drawn on 2 or more sheets are intended to form one whole figure, the figures on the several sheets shall be so arranged that the whole figure can be assembled without concealing any part of the partial figures; and the different figures shall be arranged without wasting space, clearly separated from one another and shall be numbered consecutively in Arabic numerals, independently of the numbering of the sheets;

(h) reference signs not mentioned in the description or claims shall not appear in the drawings, and *vice versa*; and the same features, when denoted by reference signs, shall throughout the application, be denoted by the same signs;

(i) the drawings shall not contain textual matter, except, when required for the understanding of the drawings, a single word or words such as “water”, “steam”, “open”, “closed”, “section on AA”, and in the case of electric circuits and block schematic or flow sheet diagrams, a few short catchwords; and

(j) the sheets of drawings shall be numbered in accordance with rule 26(14) and (15).

(6) Flow sheets and diagrams shall be considered drawings for the purposes of these Rules.

Abstracts.

25. (1) The abstract shall commence with a title for the invention.

(2) The abstract shall contain a concise summary of the disclosure as contained in the specification.

(3) The summary shall indicate the technical field to which the invention belongs and be drafted in such a way which allows a clear understanding of the technical problem to which the invention relates, the gist of the solution of that problem through the invention, and the principal use or uses of the invention.

(4) Where appropriate, the abstract shall also contain the chemical formula which, among those contained in the specification, best characterises the invention but shall not contain statements on the alleged merits or value of the invention or on its speculative application.

(5) The abstract shall be as concise as the disclosure permits and shall normally not contain more than 150 words.

(6) If the specification contains any drawings, the applicant shall indicate on the abstract the figure or, exceptionally, the figures of the drawings which he suggests should accompany the abstract when published.

(7) The Registrar may decide to publish one or more other figures if he considers that they better characterise the invention.

(8) Each main feature mentioned in the abstract and illustrated by a drawing shall be followed by the reference sign used in that drawing.

(9) The abstract shall be so drafted that it constitutes an efficient instrument for the purposes of searching in the particular technical field, in particular by making it possible to assess whether there is a need to consult the specification itself.

Size and presentation of documents.

26. (1) This rule shall apply to all documents (including drawings) making up an application for a patent, including any replacement thereof, to be filed with the Registry.

- (2) All documents referred to in sub-rule (1) shall be in the English language.
- (3) Unless otherwise provided, the specification (including any drawing therein), abstract and any replacement sheet thereof shall be filed singly.
- (4) All documents referred to in sub-rule (1) shall be so presented as to permit direct reproduction by photography, electrostatic or electronic processes, scanning, photo offset and microfilming, in an unlimited number of copies.
- (5) All sheets must be free from cracks, creases and folds.
- (6) Only one side of the sheet shall be used.
- (7) All documents referred to in sub-rule (1) shall be in A4 sheet size (29.7 cm x 21 cm) and shall be on pliable, strong, white, smooth, matt and durable paper.
- (8) Each sheet (other than drawings) shall be used with its short sides at the top and bottom (upright position).
- (9) The request for the grant of a patent, the description, claims, drawings and abstract shall each commence on a new sheet.
- (10) The sheets shall be so connected that they can be easily turned when consulted, and easily separated and joined again if they have been separated.
- (11) The minimum margins of the sheets containing the description, the claims and the abstract shall be as follows –
 - (a) top: 2.0 cm;
 - (b) left side: 2.5 cm;
 - (c) right side: 2.0 cm; and
 - (d) bottom: 2.0 cm.

(12) The margins of the documents making up the application, when filed, and of any replacement documents, must be completely blank.

(13) In the application, except in the drawings –

(a) all sheets in the request shall, when filed, be numbered consecutively; and

(b) all other sheets shall, when filed, be numbered consecutively as a separate series, and all such numbering shall be in Arabic numerals placed at the top or bottom of the sheet, in the middle, but not in the top or bottom margin.

(14) All sheets of drawings contained in the application shall be numbered consecutively as a separate series.

(15) Such numbering shall be in Arabic numerals placed at the top or bottom of the sheet, in the middle, but not in the top or bottom margin.

(16) Every document (other than drawings) referred to in sub-rule (1) shall be typed or printed in a dark, indelible colour in at least 1 1/2 line spacing and in characters of which the capital letters are not less than 0.21 cm high except that graphic symbols and characters and chemical and mathematical formulae may be written or drawn, in a dark indelible colour.

(17) The request for the grant of a patent, the description, claims and abstract shall not contain drawings.

(18) The description, claims and abstract may contain chemical or mathematical formulae.

(19) The description and the abstract may contain tables.

(20) The claims may contain tables only if their subject-matter makes the use of tables desirable.

(21) In all documents referred to in sub-rule (1), units of weights and measures shall be expressed in terms of the metric system.

(22) If a different system is used, units of weights and measures shall also be expressed in terms of the metric system.

(23) Temperatures shall be expressed in degrees Celsius.

(24) For the other physical values, the units recognised in international practice shall be used, for mathematical formulae the symbols in general use, and for chemical formulae the symbols, atomic weights and molecular formulae in general use shall be employed.

(25) In general, use should be made of technical terms, signs and symbols generally accepted in the field in question.

(26) If a formula or symbol is used in the specification, a copy thereof, prepared in the same manner as drawings, shall be furnished if the Registrar so directs.

(27) The terminology and the signs shall be consistent throughout the application.

(28) All documents referred to in sub-rule (1) shall be reasonably free from deletions and other alterations, over-writings and interlineations and shall, in any event, be legible.

(29) Non-compliance with this rule may be authorised by the Registrar if the authenticity of the content is not in question and the requirements for good reproduction are not in jeopardy.

Form of statements, counter-statements and evidence.

27. Rule 26(4) to (8) shall apply, with the necessary modifications, to any statement, counter-statement or evidence filed, unless the Registrar directs otherwise.

Unity of invention.

28. (1) Notwithstanding section 25(5)(d), where 2 or more inventions are claimed (whether in separate claims or as alternatives within a single claim), such inventions shall be treated as being so linked as to form a single inventive concept only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features.

(2) In this rule, “special technical features” means those technical features which define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art.

Award of costs on surrender of patent.

89. If, in proceedings before the Registrar under section 77, the proprietor of a patent offers to surrender his patent under section 41, the Registrar shall, in deciding whether costs should be awarded to the applicant for revocation, consider whether proceedings might have been avoided if the applicant had given reasonable notice to the proprietor before the application was filed.

Notification of an opportunity to amend.

90. (1) Where it appears to the Registrar in accordance with section 78 that the patent ought to be revoked, the proprietor of the patent shall be so notified and afforded an

Treatment of international applications.

92. (1) Subject to this rule, in relation to an international application for a patent (Brunei Darussalam) which is, under section 82, to be treated as an application for a patent under the Order, the prescribed period for the purposes of section 83(3) and (5) shall be –

or

(b) in any other case, 20 months from the relevant date.

(2) Payment of the prescribed fee shall be made within the period prescribed in sub-rule (1)(a) or (b), as the case may be, and if the applicant so wishes, together with the filing of Patents Form 42.

(3) Where an international application for a patent (Brunei Darussalam) has begun the national phase, a request may be made under section 17(4) within one month from the date the national phase of the application begins.

(4) In the case of an international application for a patent (Brunei Darussalam) –

(a) rule 8(1) shall not apply if the applicant, on filing the application, states in writing to the receiving Office that the invention has been displayed at an international exhibition;

(b) rule 8(2), (3) and (4) may be complied with at any time before the end of 2 months from the time limit for entering the national phase;

(c) where an English translation of a document or part of a document is required by the Order or these Rules to be filed before or at the time limit for entering the national phase, verification of the translation, as required under rule 118 and permitted by rule 51 bis 1(d) of the Rules under Patent Co-operation Treaty, may be given to the Registrar at any time before the end of 2 months from that time limit.

(5) For the purposes of section 83(3) and (5), where an English translation of the application or any amendment of the application is required, the translation –

(a) shall exclude the request and abstract unless –

(i) the applicant expressly requests the Registrar to proceed earlier than the expiry of the period prescribed in sub-rule (1); and

(ii) the application has not been published in accordance with the Patent Co-operation Treaty;

(b) shall include any textual matter in the drawings in a form which complies with rule 49.5(d) of the Rules under the Patent Co-operation Treaty;

(c) where a title has been established by the International Searching Authority under rule 37.2 of the Rules under the Patent Co-operation Treaty which differs from the title included in the application as originally filed, shall include the former title in place of the latter; and

(d) may exclude any textual matter contained in a sequence listing forming part of the description if such textual matter complies with rule 12.1(d) of the Rules under the Patent Co-operation Treaty and the description complies with rule 5.2(b) of those Rules.

(6) Where an applicant is required to file a translation into the English language both of an application as originally filed and of the amendment to it, in accordance with sub-rule (5), in order to satisfy the relevant conditions of section 83(3) and (5) and at the expiry of the applicable period referred to in sub-rule (1), the prescribed fee has been paid and one but not both of the necessary translations has been filed –

(a) the Registrar shall give notice to the applicant at the address furnished by the applicant in accordance with rule 35 requiring the applicant to file the required translation within 2 months from the date on which the notice is sent; and

(b) the applicable period shall be treated in respect of that translation as not expiring until the end of the period specified in the notice given under paragraph (a).

(7) The Registrar shall publish any translation supplied in accordance with section 83(3) or (5) following the filing of Patents Form 43 accompanied by the payment of the prescribed fee.

(8) In the case of an international application for a patent (Brunei Darussalam) in respect of which the conditions specified in section 83(3)(a) are satisfied, the period prescribed for the purposes of section 24(2) shall be 2 months from the time limit for entering the national phase.

(9) In the case of an international application for a patent (Brunei Darussalam) in respect of which the conditions specified in section 83(3)(b) are satisfied, the period prescribed for the purposes of section 24(2) shall be the later of the following periods to expire –

- (a) the period prescribed by rule 21(1);
- (b) 2 months from the date on which those conditions are satisfied.

(10) Where, in relation to an international application for a patent (Brunei Darussalam), the applicant desires that section 82(1) shall not cease to apply to the application by virtue of the operation of section 82(3), application shall be made to the Registrar on Patents Form 44, accompanied by a statement of the facts upon which the applicant relies.

(11) An international application for a patent (Brunei Darussalam) shall not be treated as withdrawn under the Order if it, or the designation of Brunei Darussalam in it, is deemed to be withdrawn under the Patent Co-operation Treaty where, in the same or comparable circumstances in relation to an application under the Order (other than an international application for a patent) –

- (a) the Registrar could have directed that an irregularity be rectified under rule 105 or that an extension be granted under rule 114; and
- (b) the Registrar determines that the application would not have been treated as withdrawn under the Order.

(12) Where under section 82(3) an application is not to be treated as withdrawn and the applicant wishes to proceed –

- (a) the Registrar may amend any document received by the Registry from the receiving Office or the International Bureau and alter any period or time which is specified in the Order or these Rules upon such terms (including payment of any appropriate prescribed fee) as he may direct; and
- (b) the fee prescribed under section 83(3) shall not be payable.

(13) Where the applicant satisfies the Registrar that –

(a) because of an error made by the receiving Office, an international application for a patent (Brunei Darussalam) has been accorded a date of filing which is incorrect; or

(b) the priority claim made under Article 8(1) of the Patent Co-operation Treaty has been considered not to have been made by the receiving Office or the International Bureau because of an error made by the Office or the Bureau,

the Registrar may amend any document received by the Registry from the receiving Office or the International Bureau or alter any period or time which is specified in the Order or these Rules as if the error were an error on the part of the Registry.

(14) Where –

(a) an international application for a patent (Brunei Darussalam) purports to designate Brunei Darussalam; and

(b) the applicant alleges that he has been refused a filing date under the said Patent Co-operation Treaty on account of an error or omission in any institution having functions under the said Patent Co-operation Treaty,

the applicant may apply to the Registrar for it to be treated as an application under the Order by filing Patents Form 44, accompanied by a statement of the facts upon which he relies; and the Registrar may amend any document filed by the applicant and alter any period or time which is specified in the Order or these Rules upon such terms as he may direct.

(15) In this rule, “receiving Office” has the same meaning as in the Patent Co-operation Treaty.

(16) In this rule, in relation to an international application for a patent (Brunei Darussalam) –

“relevant date” means the declared priority date or, where there is no declared priority date, the date of filing of that application;

“time limit for entering the national phase” means the end of the relevant period prescribed by sub-rule (1) or, in a case where that period has been

extended under sub-rule (6), rule 105 or 114, the end of that period as so extended.

(3) In *inter partes* proceedings, any party who intends to refer at the hearing to any document not already mentioned in the proceedings shall, unless the Registrar consents and the other party agrees, give at least 14 days' notice of his intention with details of, or a copy of, the document to the Registrar and the other party.

(4) After hearing the party or parties desiring to be heard or, if no party so desires, without a hearing, the Registrar shall decide the matter and shall notify all parties of his decision and, if any party so desires, shall give his reasons for the decision.

Hearings in public.

95. (1) Subject to sub-rule (2), where a hearing before the Registrar of any dispute between 2 or more parties relating to any matter in connection with a patent or an application

the advocate and solicitor or person shall file a declaration of authorisation in Patents Form 46 on the first occasion when he acts on behalf of the party.

(1) Except where rule 9(3) or 62(3) applies, a request for the correction of an error of translation or transcription or of a clerical error or mistake in any specification of a patent, in an application for a patent or in any document filed in connection with a patent or such an application shall be made on Patents Form 28.

(2) The request shall be accompanied by a copy of the document with the proposed correction indicated in the following manner –

(a) by striking through any text, figure or other matter to be replaced or deleted; and

(b) by underlining any replacement text, figure or other matter.

(3) Where such a request relates to a specification, no correction shall be made therein unless the correction is obvious in the sense that it is immediately evident that nothing else would have been intended than what is offered as the correction.

(4) Where the Registrar requires notice of the proposed correction to be advertised, he shall inform the applicant in writing accordingly and request him, within 2 months from the date of his letter, to file Patents Form 47; and upon receipt of the form the Registrar shall proceed with the advertisement.

(5) The advertisement under sub-rule (4) shall be made by publication of the request and nature of the proposed correction in the journal and in such other manner as the Registrar may direct.

(6) Any person may, at any time within 2 months from the date of the advertisement, give notice to the Registrar of opposition to the request on Patents Form 48.

(7) Such notice of opposition shall be accompanied by a supporting statement setting out fully the facts on which the opponent relies and the relief which he seeks.

(8) The Registrar shall send a copy of the notice and the statement to the person making the request who, if he desires to proceed with the request, shall, within 2 months from the date of the Registrar's letter forwarding such copies to him, file a counter-statement on Patents Form 3 setting out fully the grounds on which he contests the opposition and the Registrar shall send a copy of the counter-statement to the opponent.

(9) The Registrar may give such directions as he may think fit with regard to the subsequent procedure.

(10) Where the Registrar grants the request for correction, the person making the request shall, if the Registrar so requires, and within the time specified by the Registrar, file a new specification as amended, which shall be prepared in accordance with rules 22, 24 and 26.

(11) No amendment or correction (other than an amendment or correction introduced in order to comply with the formal requirements) may be introduced in the new specification to be filed under sub-rule (10).

(5) Nothing in this rule shall be construed as imposing on the Registrar any duty of making available for public inspection any document or any part of a document –

(a) which in his opinion disparages any person in a way likely to damage him; or

(b) the publication or exploitation of which would in his opinion be generally expected to encourage offensive, immoral or anti-social behaviour.

MICRO-ORGANISMS

Applications.

1. (1) The specification of an application for a patent, or of a patent, for an invention which requires for its performance the use of a micro-organism –

(a) which is not available to the public at the date of filing of the application; and

(b) which cannot be described in the specification in such a manner as to enable the invention to be performed by a person skilled in the art,

shall, in relation to the micro-organism itself, be treated for the purposes of the Order as disclosing the invention in such a manner only if one of the conditions set out in sub-paragraph (2), is satisfied.

(2) The conditions referred to in sub-paragraph (1) are –

(a) a condition that –

(i) not later than the date of filing of the application, a culture of the micro-organism has been deposited with any international depositary authority which is able to furnish a sample of the micro-organism; and

(ii) the name of the international depositary authority, the date when the culture was deposited and the accession number of the deposit are given in the specification of the application; and

(b) a condition, in the case of an international application for a patent (Brunei Darussalam) which is treated, by virtue of section 85 as a patent under the Order, or, as the case may be, an application for a patent under the Order, that the corresponding provisions of the Implementing Regulations to the Patent Co-operation Treaty have been complied with,

and where a new deposit is made under paragraph 4, a further condition that the applicant or proprietor makes a new deposit in accordance with that paragraph.

(3) Where the condition of sub-paragraph (2)(a)(ii) is not satisfied at the time the application for a patent is filed, it shall be satisfied –

whichever is the earliest.

(4) The giving of the information specified in sub-paragraph (2)(a)(ii) shall constitute the unreserved and irrevocable consent of the applicant to the international depositary authority with which a culture (including a deposit which is to be treated as having always been available by virtue of paragraph 4(2)) is from time to time deposited making the culture available on receipt of the Registrar's certificate authorising the release to the person who is named therein as a person to whom the culture may be made available and who makes a valid request therefor to the authority.

Availability of cultures.

2. (1) Subject to paragraph 3, a request that the Registrar certify a person as a person to whom an international depositary authority may furnish a sample of a micro-organism –

(b) not to use the culture, or any culture derived from it, otherwise than for experimental purposes relating to the subject matter of the invention, and –

- (i) subject to sub-paragraph (iii), both undertakings shall have effect during any period before the application for a patent has been withdrawn, has been treated as having been abandoned, has been refused or is treated as having been refused (including any further period allowed under rule 110, 120(1) or (6) but excluding, where an application is reinstated under either of those rules, the period before it is reinstated);
- (ii) if a patent is granted on the application, the undertaking set out in sub-paragraph (a) shall also have effect during any period for which the patent is in force and during the period of 6 months referred to in section 35(3); and

(6) Unless, within the period specified by the Registrar under sub-paragraph (5) (or within such longer period as the Registrar may, on application made to him within that period, allow), the applicant for the patent sends notice in writing to the Registrar that he objects to a sample of the micro-organism being made available to the expert and gives his reasons for his objection, the Registrar shall send a copy of any form lodged with him under sub-paragraph (4)(a) and of his certificate authorising the release of the sample –

(a) to the applicant for the patent;

(b) to the international depositary authority concerned;

(c) to the requester; and

(d) to the expert.

(7) Where, in accordance with sub-paragraph (6), the applicant for the patent sends notice to the Registrar of his objection to the issue of a certificate in favour of the expert, the Registrar –

(a) shall decide, having regard to the knowledge, experience and technical qualifications of the expert and to any other factors he considers relevant, whether to issue his certificate in favour of the expert; and

(b) if he decides to authorise the release of the sample to the expert, shall send to the persons referred to in sub-paragraph (6) a copy of any form lodged with him under subparagraph (4)(a) and of his certificate authorising the release of the sample to the expert.

(8) Before making a decision in accordance with sub-paragraph (7), the Registrar shall afford the applicant and the requester the opportunity of being heard.

- (c) ceases for any reason to conduct its activities as an international depositary authority in an objective and impartial manner, subject to sub-paragraph (3), the applicant or proprietor may, unless the culture has been transferred to another international depositary authority which is able to make it available, make a new deposit of a culture of the micro-organism.

(2) For the purposes of paragraph 1 and this paragraph, the deposit shall be treated as always having been available if, within 3 months of the receipt of such notification or of the international depositary authority ceasing to perform the functions of an international depositary authority or to conduct its activities as such an authority in an objective and impartial manner, the applicant or proprietor –

- (a) in a case where the deposit has not already been transferred, makes the new deposit;
- (b) furnishes to the international depositary authority with which the new deposit is made a declaration that the culture so deposited is of the same micro-organism as was the culture originally deposited; and
- (c) requests amendment of the specification under section 31 or 38, as the case may be, so as to indicate the accession number of the transferred or new deposit and, where applicable, the name of the international depositary authority with which the deposit has been made.

- (3) The new deposit referred to in sub-paragraph (1) –
- (a) shall, subject to sub-paragraph (b), be made with the same international depositary authority as was the original deposit; or
 - (b) in the cases referred to in sub-paragraphs (1)(a)(ii), (b) and (c), shall be made with another international depositary authority which is able to satisfy the request.
